Summary

React Native Developer with 3.3+ years of professional experience in designing, developing, and maintaining high-performance mobile applications for Android and iOS. Strong hands-on expertise in React Native, JavaScript, TypeScript, Redux, Redux Toolkit, React Navigation, REST API integration, and reusable component development. Experienced in building scalable and responsive applications, integrating backend APIs, implementing state management, debugging production issues, and optimizing application performance. Comfortable working in Agile environments and collaborating with UI/UX designers, backend developers, QA engineers, and business stakeholders to deliver reliable, user-focused solutions. Strong problem-solving skills with a focus on clean, maintainable, and reusable code.

Professional Experience

Software Engineer, *Webingate Solutions Pvt Ltd* 06/2023 – Present
Hyderabad, Telangana

- Designed, developed and maintained enterprise-scale Web, Android and iOS applications using React.js, React Native, TypeScript, JavaScript and Spring Boot.
- Architected reusable UI components and shared libraries, improving development efficiency and maintainability across projects.
- Implemented scalable state management using Redux, Redux Toolkit, Context API and React Hooks, improving application maintainability and performance.
- Integrated RESTful APIs with frontend applications, enabling secure authentication, real-time data synchronization and seamless user experiences.
- Improved application performance through lazy loading, memoization, code splitting, image optimization and efficient API caching.
- Implemented Git branching strategies, pull request reviews and release management processes to improve deployment quality and collaboration.

Education

Sri Vasavi Degree College & PG college Mahabubnagar

Shraddha Junior college Mahabubnagar

Project Experience

Servicing App & Multi-Service Booking & Management App (Live on App Store and Play Store)

- Developed reusable and responsive UI screens using React Native and TypeScript.
- Implemented service categories, subcategories, provider listings, and service details.
- Integrated REST APIs for authentication, services, bookings, payments, and provider management.
- Implemented state management using Redux/Redux Toolkit and React Hooks.
- Integrated secure local storage for user and provider information.
- Developed booking, payment, subscription, and service management workflows.
- Implemented form validation, loading states, error handling, and API response handling.
- Worked on performance optimization, debugging, and fixing UI and functional issues.
- Collaborated with backend developers, QA, designers, and other team members.
- Maintained reusable components and clean, scalable code for Android and iOS.

LubeTrack - Smart Oil Analysis & Lubrication Management (Live on App store and Play Store)

- Developed cross-platform mobile applications using React Native for Android and iOS.
- Designed and implemented responsive, reusable, and user-friendly UI components.
- Integrated REST APIs for authentication, oil analysis reports, equipment details, customer management, and maintenance data.
- Implemented secure user authentication and local data storage using React Native Encrypted Storage.

- Managed navigation using React Navigation with Stack and Bottom Tab navigators.
- Developed role-based access and dynamic screens for different user types.
- Optimized application performance, state management, and API handling.
- Fixed bugs, improved application stability, and enhanced user experience.
- articipated in deployment, testing, and maintenance of the application.

Dinkgrid – Sports League and Match Management App (Live on App Store and Play Store)
- Led frontend development of a sports management platform designed for leagues, clubs, tournaments, and players.
- Developed Android and iOS applications using React Native and TypeScript for league management, player registration, team management, and match scheduling.
- Built reusable UI components and scalable architecture to support rapid feature development.
- Implemented tournament brackets, rankings, player statistics, match tracking, and score management features.
- Utilized React Navigation, React Hooks, and Context API for efficient application state and navigation management.
- Integrated RESTful APIs and collaborated closely with backend teams to ensure seamless data synchronization.
- Improved application performance through lazy loading, memoization, and component optimization techniques.
- Participated in feature planning, sprint execution, code reviews, and production releases.
- Tools Used: React Native, TypeScript, React Navigation, Context API, REST APIs, Xcode, Android Studio

AIOPOS – Restaurant Management System (Order, Customer, Kitchen and Kiosk Apps)
- Developed a complete restaurant management ecosystem including Order Management, Customer, Kitchen, and Kiosk modules.
- Built intuitive interfaces for order processing, routing, kitchen updates, and self-service kiosk interactions.
- Implemented real-time workflows including feedback handling, status tracking, and approval processes.
- Integrated advanced search and filter features for past orders and campaigns to improve operational efficiency.
- Optimized state management, modular architecture, and API communication for high performance.

Osler 360 – Online Appointment and Management App
- Developed a healthcare management platform enabling patients, physicians, and healthcare organizations to efficiently manage appointments and medical records.
- Built responsive web and mobile applications for Android, iOS, and Web platforms using React JS and React Native.
- Implemented secure authentication, patient profile management, appointment scheduling, and medical report tracking functionalities.
- Developed physician dashboards for managing appointments, patient histories, diagnoses, and treatment plans.
- Collaborated closely with stakeholders to deliver user-friendly healthcare solutions.
- Tools Used: React JS, React Native, TypeScript, Java, Spring Boot, Xcode

Skills Summary

UI Developer
Having 3.3 years of experience as UI Developer.

UI Development Skills
Excellent UI Development skills like React, React Native HTML5, CSS3, JavaScript, Typescript,WordPress

Adaptability
Quick adaptability to new technologies and zeal to improve technical skills.

Mobile Apps Development
Experienced in developing Mobile Apps.

React-native and Android
3.3 year of experience in React-native and Android.

Team worker
Excellent team worker with good inter personal skills and leadership qualities.
